

CEWELD 2594 Super Duplex

TYPE 2594 Super Duplex stainless steel Mig/Mag GMAW welding wire for Zeron 100, Uranus 76, SAF 2507 and similar alloys

APPLICATIONS CEWELD® 2594 Super Duplex was specially developed for welding super duplex ferritic-austenitic steels (25% Cr, 9% Ni, 4% Mo). It is characterized by high tensile strength and toughness as well as excellent resistance to stress corrosion cracking, pitting, and intergranular corrosion. The operating temperature range is between -50 °C and 250 °C.
The alloy is often used in applications where corrosion resistance is of paramount importance. The pulp and paper industry, as well as the offshore and gas industries, are areas of interest.

PROPERTIES CEWELD® 2594 Super Duplex exhibits high resistance to intergranular corrosion, pitting, and stress corrosion cracking, and has exceptional mechanical strength properties. Particularly in H2S-containing environments. Suitable for operating temperatures from -40°C to +220°C.
